Aurelian Oil & Gas PLC, is a European focused E&P Company whose core purpose is to create shareholder value through the capture, evaluation, exploration, appraisal and development of onshore hydrocarbon resources and the application of conventional technologies to underexplored proven hydrocarbon systems. It was founded in December 2002, by Michael Seymour to focus on the established oil provinces in the central European countries of the former CIS where there had been little investment in seismic and drilling technology during the previous 20 years.
