

Aurelian Oil & Gas PLC

Award of Poznan North Concession, Poland

Aurelian Oil and Gas PLC (“Aurelian” or “the Company”) announces on behalf of its Polish subsidiary, Energia Zachod Sp. z o.o., that it has been awarded the Poznan Polnok (Poznan North) exploration concession by the State Treasury of Poland. The concession area mainly lies within the northern and eastern suburbs of the City of Poznan.

Poznan Polnok is adjacent and to the west of the Poznan Wschod (Poznan East) concession, where Aurelian drilled the successful Trzek-1 gas well in 2007. The award of the concession will enable the evaluation of the probable westward extension under Poznan City of the Siekierki structural trend on which Trzek-1 was drilled.

Energia Zachod Sp. z o.o. is owned 90% by Aurelian and 10% by Avobone Poland B.V.

The technical information and opinions contained in this announcement have been reviewed by Roy Hartley B.Sc (Hons) (Imperial College), FEI, FGS, C.Eng, Aurelian’s Operations Director who has over 30 years’ experience in the oil exploration and production industry. He has consented to the inclusion herein of such technical information and opinions.

Michael Seymour, Aurelian’s Managing Director, commented:

“Poznan Polnok is an important addition to our Siekierki project. The 3-D seismic coverage, recently acquired and now being processed, will provide important technical information about the Poznan Polnok area and we believe additional gas resources can and will be produced from here.

Over the forthcoming months, such coverage as it has been possible to obtain over the Poznan Polnok area in the 3D seismic survey will be evaluated and integrated with the existing interpretation of the Siekierki trend.”

1 July 2008

Notes to Editors:

Aurelian Oil & Gas PLC, was founded in December 2002, by Managing Director, Michael Seymour to focus on the established oil provinces in the central European countries of the former CIS where there had been little investment in seismic and drilling technology during the previous 20 years. The Company has since developed rapidly from a pure exploration company into its present position with a wide portfolio of interests in concessions in Poland (14), Slovakia (3), Romania (4) and Bulgaria (2), and a range of production, appraisal and exploration projects.

The near-term focus is aimed at establishing substantial production while continuing to build up potential for future development with a dynamic exploration programme across the region. The Poznan East project is the key to short term development and by 2010/2011 should be producing substantial quantities of gas and commensurate revenues.
