Aurelian Oil & Gas PLC

("Aurelian" or "the Company")

Polish Operational Update

Aurelian, the European focussed E&P Company, is pleased to provide the following operational update.

14-28 day stabilised flow test commenced at second Siekierki Multi-Fraced Horizontal Well ("MFHW") Trzek-3.

A stabilised flow test, expected to last between 14 and 28 days, has now commenced at the second Siekierki MFHW, Trzek-3. The planned six fracs have been completed without material mechanical issues. Well clean up operations and a Memory Production Log have all been completed.

A further update will be provided at the end of the stabilised flow test.

Trzek-3 is targeting a separate high to other wells in the Siekierki structure with a recoverable resource estimated at between 16 and 28bcf.

The Siekierki project is located on the Poznan licences which are 100% held by Energia Zachód Sp. z.o.o., a company owned 90% by Aurelian and 10% by Avobone N.V.

The technical information and opinions contained in this announcement have been reviewed by Roy Hartley B.Sc (Hons) (Imperial College), FEI, FGS, C. Eng, Aurelian's Operations Director who has 40 years of experience in the oil exploration and production industry. He has consented to the inclusion herein of such technical information and opinions.
